

STEERING PUMPS OLD CORES POLICY

The power steering pumps delivered for the reconditioning operations have to correspond to the requisites that guarantee the possibility of the reconditioning.

It's necessary to verify the integrity of the body which must not present any damages or flaws due to bumps. As regards the hydraulic parts, they have to result in good conditions and not to present any kind of breaking and however not in conditions to compromise its functionality.

The power steering pumps that not correspond to the listed conditions will be at our customer's disposal.

Examples of not accepted old cores :

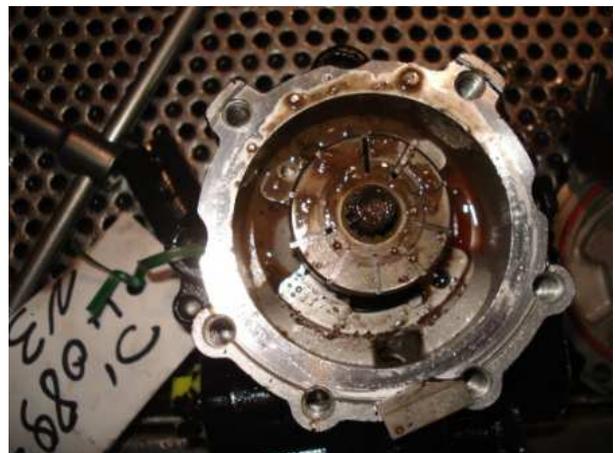

Broken bottom

Broken tank

Broken axle

Dirty oil (claims)
